

The UK Serials Group

The UK Serials Group is a non-profit making body whose primary aim is to bridge the gap between the producer and the end user of serials, by providing a forum for the interchange of information, ideas, suggestions and the solution of problems.

The Group is completely autonomous and is not linked to any other existing organisation in the information industry, so that the best interests of all concerned may be achieved.

The main objectives of the Group are:

- ✦ to encourage and promote a continuing discussion concerning serials and associated areas, between all interested parties in the information industry, both nationally and internationally
- ✦ to develop and maintain links between all those concerned with the production, distribution and use of serials
- ✦ to encourage professional awareness in all those connected with serials
- ✦ to encourage and assist in the development of appropriate research in the field of serials management

Membership is open to any organisation or individual and the annual membership fee for 1994 is £48.00.

The Group holds an annual conference, runs seminars on a variety of topics, publishes a regular journal, *Serials*, and has a well-established publications programme.

Further details including a membership application form are available from Jill Tolson, UKSG Administrator, 114 Woodstock Road, Witney, Oxford, OX8 6DY tel: 0993 703466; fax: 0993 778879; E-mail: uksg@bham.ac.uk
