

## New Products and Services

These short, occasional features are intended as channels of information from member to member. Any member with a new product or service to offer may submit a description of not more than 500 words by the first of the month preceding each issue of *Serials*, which is published in March, July and November. The Editor will retain editorial control of the content. Send contributions to: UKSG, Hilltop, Heath End, Newbury, RG20 0AP.

### New Journals from Lippincott Williams and Wilkins in 2000

#### Evidence-Based Eye Care

Chief Editors: Sanjay Sharma, Assistant Professor of Ophthalmology and Epidemiology, Queen's University, Kingston, Ontario, Canada; Gary C Brown, Director, Retinal Vascular Unit, Wills Eye Hospital, Philadelphia, USA; Melissa M Brown, Cataract and Primary Eye Care Service, Wills Eye Hospital, Philadelphia, USA

Every issue of *Evidence-Based Eye Care* includes analyses of approximately two dozen critically relevant articles in the categories of clinical studies or trials, medical socioeconomics and politics as it relates to healthcare. The journal will supply evidence-based (as opposed to anecdotal) approaches to eye care. *Evidence-Based Eye Care* provides the most time-effective, cost-efficient methods of treatment to busy clinicians.

*Evidence-Based Eye Care* is a clinically relevant, high-quality, user-friendly, reliable source of information for practising ophthalmologists.

ISSN: 1525-8599, Frequency: Quarterly, Volume: 1, Institutional Price: \$109.00, Air Freight: \$7.00

#### Journal of Clinical Neuromuscular Disease

Editor-in-Chief: Rahman Pourmand, Department of Neurology, Indiana University School of Medicine, Indianapolis, USA

Published quarterly, the *Journal of Clinical Neuromuscular Disease* provides original articles presenting clinical findings on practically every aspect of neuromuscular disease. Review articles

provide the latest information on diagnosis and treatment and each issue highlights the most advanced and successful approaches to diagnosis, functional assessment, surgical intervention, pharmacologic treatment, rehabilitation and more.

A special section includes Neuromuscular Case Reviews that emphasise particular cases and explore diagnoses and management strategies: Images in Neuromuscular Diseases present brief case histories using images to depict radiologic or histologic characteristics, EMG findings, or other clinical features of the disease. This journal provides clinical coverage of every aspect of neuromuscular disease.

ISSN: 1522-0443, Frequency: Quarterly, Volume: 1, Institutional Price: \$144.00, Air Freight: \$4.00

#### Journal of Women's Imaging

Editor-in-Chief: Marcia C Javitt, Director of Women's Imaging, Mercy Medical Center, Baltimore, USA.

*Journal of Women's Imaging* is the only journal in this new subspecialty focusing exclusively on recognising and diagnosing specific diseases and abnormalities affecting women. Written and edited by world renowned specialists, this journal provides definitive guidance in diagnostic and therapeutic gynaecologic, body and breast imaging, using a variety of imaging techniques to help practitioners refine and expand their use of imaging in clinical practice.

Each quarterly issue features original articles covering both current techniques and emerging

developments in the imaging of women during their reproductive and post-reproductive years. All articles are peer-reviewed by a multidisciplinary editorial board of leading experts in the field. Topics covered include infertility; pelvic imaging; pelvic masses; breast imaging efficacy and cost-effectiveness; stereotaxic and ultrasound-guided breast aspiration and biopsy; breast cancer follow-up; postmenopausal osteoporosis; hormone replacement therapy; and economic and political aspects of women's health issues.

*ISSN: 1084-0443, Frequency: Quarterly, Volume: 2, Institutional Price: \$128.00, Air Freight: 4.00*

### **Techniques in Shoulder & Elbow Surgery**

*Editor-in-Chief: Russell F Warren, Surgeon-in-Chief, Hospital for Special Surgery, New York, USA*

*Techniques in Shoulder & Elbow Surgery* offers a unique opportunity to consult with leading

orthopaedic surgeons in the area of shoulder and elbow surgery. Expert surgeons share their personal techniques for correction of the entire spectrum of shoulder and elbow conditions and demonstrate how to incorporate these successful techniques into the reader's practice. Published quarterly, the journal escorts the reader into the operating room and supplies step-by-step details of exciting and advanced techniques. It explains the evolution of and rationale for the procedures, identifies the pitfalls and possible complications, provides invaluable tips for improving surgical results and is illustrated cover to cover with high-quality intraoperative photographs and drawings, many in full colour.

*ISSN: 1523-9896, Frequency: Quarterly, Volume: 1, Institutional Price: \$144.00, Air Freight: \$4.00*
