

Scientific, technological and medical journal publication in Japan

SOICHI TOKIZANE

Aichi University, Japan

This article originally appeared in *Serials*, 2008, 21(2), 127–133

Corrigenda

The following changes to the original text have been requested by the author (August 2008):

Page 127	Abstract, line 8	964 titles were online
	<i>should read:</i>	949 titles were online
	Abstract, line 10	English-language journals (80.3%)
	<i>should read:</i>	English-language journals (76.1%)
Page 130	Final paragraph	Altogether, 964 journals (36.3%) were published as electronic journals in 2005 out of 2,655 (Table 9) scholarly journals in the STM fields. The percentage is high (80.3%) for English-language journals but low (29.6%) for Japanese- or mixed- language journals.
	<i>should read:</i>	Altogether, 949 journals (35.7%) were published as electronic journals in 2005 out of 2,655 (Table 9) scholarly journals in the STM fields. The percentage is quite high (76.1%) for English-language journals but low (29.6%) for Japanese- or mixed- language journals.
Page 131	Table 9, final columns	No of scholarly journals published in 2005
	Total electronic journals	Total 964
	<i>should read:</i>	Total 949
	English-language	282
	<i>should read:</i>	267
	% of electronic journals	Total 36.3
<i>should read:</i>	Total 35.7	
	English-language	80.3
<i>should read:</i>	76.1
